#### How it Works

1. **Digital Cameras** are used at the crime scene, in the Autopsy Suite or at the Death Scene to capture high quality images.
2. Photos are **immediately reviewed** on the digital camera to assure quality. Additional images are taken as necessary.
3. Digital images are loaded into Police Central Evidence Processor and automatically **stored by Case Number**.
4. Evidence Processor will automatically **certify** and **secure** the images as original and unaltered. Images **cannot** be altered.
5. The user may print a "**contact sheet**" with case details as required. Date and Time stamps are created by the system.
6. Images may be "**enhanced**" or "**annotated**" for clarity. The original photograph is maintained unchanged.
7. Copies of the images or **enhancements** printed at any time.
8. **Film Quality Prints** can be produced when needed.
9. High Quality **35mm Slides** can be generated for Presentations.
