

## Jail Management

These Police Central Submodules work in conjunction with the **Arrest & Booking Module** to provide comprehensive **Jail Management** capabilities. They may be added singly or in any combination to suit your local needs. Each Submodule provides a **complete solution**, yet are **integrated** together to provide a completely seamless system. As an example, the officer is informed during inmate release if an inmate has unclaimed property or money. Access and privileges to each submodule is provided by Police Central's **robust security** system that grants users individual privileges. All submodules have a set of standard **reports** that are relevant to the application, and reports may be supplemented by the user as desired. And, these reports may be **scheduled to run** automatically, and even automatically emailed if necessary. If a submodule contains **critical information**, it is graphically disclosed to all users via Police Central's exclusive use of "**Banners**" and "**Flags**". As with all Police Central products, full access is provided to the user with only a **Browser** on a **secure intranet** within the facility.

### Personal Information Section

The Personal Section captures all relevant **Personal Information**, including name, addresses, aliases, height, weight, hair, eyes, facial hair, complexion, etc. and have Drop-Down Lists for easy, **NCIC** standardized entries. Maintains complete **histories**. All fields are **Searchable** in any combination. A&B automatically generates **Jail Population Report**, as well as Wanted Posters, Wrist Bands, and other Jail reports. Automatically **flags juvenile** records. Provides complete **audit trail** indicating user who has created, accessed, modified or deleted records. System maintains key identifiers, including FBI number, State Offender number, and even Henry Fingerprint classifications. Other supplemental fields may be added for **local** needs.

### Classification, Medical & Property

These three important submodules are important during the **Intake process**. Inmate Classification utilizes generally accepted **classification questionnaire** following **NIC guidelines**. Results may be overridden by authorized personnel. **Inmate Medical** is a complete **medical survey** during Intake, and maintains **medication schedules, history, and appointments**. **Inmate Property** maintains a complete inventory of **personal property** seized during Intake, as well as **agency property** provided during incarceration. The Inmate Property submodule automatically **assigns storage locations**, prints receipts and controls property release. All modules interact with Arrest & Booking and provide information to all authorized users.

#	Inmate Property Type	Location	Item Status	Item Color	Summary Description
001	Shirt	Inmate Property-L-002	Checked In	White	LONG SLEEVE DRESS SHIRT
002	Pants	Inmate Property-L-002	Checked In	Brown	SIZE 36
003	Boots	Inmate Property-L-002	Checked In	Black	SIZE 12
004	Wallet	Inmate Property-L-002	Checked In	Blue	WITH CONTENTS
005	Hat	Inmate Property-L-002	Checked In	Red	
006	Sunglasses	Inmate Property-L-002	Checked In	Black	RAY BAN

### Cash Account, Visitors, Officer Reports

Inmate Cash Account maintains a running balance of all money and expense of the Inmate. All transactions are indelible, and may not be altered by any user, thus providing a secure, accurate transaction log of inmate funds. The Inmate Visitor submodule automatically builds a history of all visitors received by the inmate. The Visitor Module automatically checks for "keep separate" people, and can provide for scheduled visits. It will optionally check all visitors for Outstanding Warrants or Civil Papers. The Officer Reports submodule is a complete incident reporting application with full narrative, including disciplinary results. All Officer Reports become part of the person's Jacket, so a full history is maintained.

### Other Modules for Complete Jail Management

- INMATE CLASSIFICATION** -- Utilizes accredited questionnaire & scoring for all inmate classifications.
- INMATE MEDICAL** -- A certified **Inmate Medical Questionnaire** for gathering an Inmate History at the time of Booking. Prints a one-page Medical Profile, complete with inmate photo.
- INMATE PROPERTY** -- Builds a complete inventory of inmate property taken at time of incarceration. Controls release of property, and prints a complete report, including inmate signatures.
- INMATE CASH ACCOUNT** -- Maintains a complete **transaction-based history** of monies received, and spent by the Inmate for easy reconciliation.
- INMATE VISITOR** -- Controls all visitation. Automatically checks Police Central Warrants and Civil Papers for outstanding Writs and Warrants on visitors. Captures photo of visitor if desired. Maintains list of authorized visitors, as well as a Restriction List.
- OFFICER REPORT** -- Used for Jail Incidents involving Officers and/or Inmates. Full details, Action Requested, Date/Time, including Narrative.
- INMATE TRACKING** -- Builds complete history of Inmate Movement and Cell Assignment within the Facility. Also tracks Court Appearances, Medical Appointments, complete with Involved Officer, Date/Time, Reason, etc.
- INMATE IDENTITY** -- Verifies Identity of Inmate for movement and release via Single Fingerprint and/or Facial Recognition
- FACIAL RECOGNITION** -- Compares "subject" photo with the library of mugshots; identifies exact or likely facial matches.
